RE: Municipal Class Environmental Assessment (EA) study - Harwood Avenue between Taunton Road and Woodcock Avenue.

Dear John,

With reference to the above study the Durham Region Cycling Coalition is very pleased to see that the final link in the MUP from Taunton Rd to Rossland Rd will be completed.

The only comments would add at this time is that cross rides be included where the MUP crosses road intersections and at any commercial driveways and also that a painted centre line be included to segregate directions of travel. The latter also tends to prevent pedestrians from wandering across the full width of the MUP.

Regards,

A handwritten signature in black ink, appearing to read "Derek Lee", with a long horizontal flourish extending to the right.

Derek Lee

Director & Ajax Ambassador
