Oshawa Creek Trail Closure

The City of Oshawa will be closing the Joseph Kolodzie Oshawa Creek Trail from the north side of Bloor Street East, south to Erie Street beginning 20 October 2025 until (subject to weather) 13 February 2025.

The closure is for the complete replacement of the existing pedestrian bridge situated just south of Bloor Street.

The City will not be posting detour routes as the only viable route would be to take Simcoe Street which has a high traffic volume, no cycling infrastructure and is not recommended for cyclists.
