Waterfront Trail Closure - Newcastle

The Municipality of Clarington has closed a section of the Waterfront Trail in Newcastle.

The closure is a precaution to protect public safety following engineering assessments that identified potential erosion issues on Lakeshore Road. Clarington is continuing active monitoring and will engage engineering specialists to design interim stabilization measures, with construction targeted for 2026.

The map below, issued by Clarington, shows the closure locations and detour route. Detour signage for cyclists and motorists have been posted.

Please note: a hard closure means the road is totally closed to all pedestrians, cyclists and motorists whereas a soft closure will allow access to local traffic only.
